Historical Background

Founding of NAT and NICB

The National Automotive Technicians' Association (NAT) was established in the 1930s to promote professional standards among automotive technicians. Over the decades, NAT expanded its scope to include training, certification, and industry research.

The National Insurance Crime Bureau (NICB), founded in 1988, focuses on preventing and investigating insurance fraud, theft, and related crimes. NICB collaborates with law enforcement, insurance carriers, and automotive stakeholders to protect the industry.

Genesis of the Joint Manual

In the early 2000s, both organizations recognized a growing need for a single, harmonized reference that bridged the gap between vehicle safety inspections and insurance compliance. The result was the first edition of the NATB NICB book manual, released in 2005. Since then, it has evolved into a multi-volume, digital-ready resource used
